

Ford Says "Action," Not "Talk," Is Business Need

Declares Intensive Development of Agriculture and Manufacture Is Shortest Cut to Relief from Depression;

Assails Wage Cuts.

BY DAVID J. WILKIE
Associated Press Staff Writer
By The Associated Press

Detroit, Mich., May 28.—The shortest cut to relief from the present business depression, in the opinion of Henry Ford, is an intensive development of agriculture and manufacture. Looking to quantity production from the soil, "this is not just a fanciful idea," Mr. Ford told the Associated Press today. "It is the way out of stagnation."

Coupling with this statement that "it will take just as long to get rid of the depression as it took to accumulate it," Mr. Ford added:

"We need to keep up the people's

spirit and you cannot do that with talk; you must do it by action. Our expenditure made in faith in the future is worth all the words any one can say. Issuing optimistic statements on the one hand and lowering wages on the other is a sure way to prevent betterment. This is no time to lower wages. Those who are lowering wages now don't know what they're doing. They are hitting the country when she is down. They will see the time when wages will be higher than they ever have been."

"Can any one man, President Hoover for example, do anything to hasten the return of business prosperity?" Mr. Ford was asked.

"Mr. Ford was asked,

MONTH IN THE SKIES
ASTRAL VIEWS FOR JUNE

Constellation in the northern sky at 2 p.m. on June 1.

BY ROBERT H. BAKER
(Professor of Astronomy, University of Illinois)

URBANA, Ill.—In the early evening in June the Great Dipper appears inverted high in the northern sky.

Polaris, the pole star or north star, marks the end of the handle of the Little Dipper, a rather faint constellation with the exception of Polaris and the two stars on the side of the bowl away from the handle.

It is the only constellation which remains always above the horizon everywhere in the United States.

whole world wants to get to work and not just reestablish conditions of a year ago. We don't want the old system back. We want a better one." Mr. Ford does not believe the "machine age" threatens the wage earner's future.

Twelve thousand years from now the pole will pass near the bright star Vega, which will then be the pole star which will then appear nearly motionless in the north, while Polaris will rise and set.

The north celestial pole, toward

which the earth's axis is directed and around which the stars appear to circle daily because of the earth's rotation, is slowly describing a circular course among the constellations, once around in 26,000 years.

The north celestial pole, toward which the earth's axis is directed and around which the stars appear to circle daily because of the earth's rotation, is slowly describing a circular course among the constellations, once around in 26,000 years.

LAST NIGHT at the THEATERS

**Gaynor, Farrell
Again Team Up**

CHARLES FARRELL and Janet Gaynor are at it again. They dance and sing—of course through a very delightful evening in High Society Blues at the Palace, today and Thursday. Judging from the reaction of the first night audience has night the show has a lot to offer.

As Eleanor Dietze just loves to strum the ukulele and sing love songs, with Charles Farrell as the Granger, the show ought to increase the popularity of the much-cursed uke, for Charles credits much of his ability at love making to his music.

The supporting cast is good, but has a hard time getting "anywhere" with an audience as long as Janet and Charles are around. Louise Erard and Lucien Littlefield are the only ones to really hold their own in a large scene in town. The troupe and his sister Joyce Clegg go to the east and attempt to crash society—all but fail. He sits or falls and strives to fit only to attract the attention of Eleanor Dietze.

Neighbor and daughter of Mrs. E. Diane (William G. Lee) who bought the Granger store.

Much of the show centers around the attempt of the Grangers to crash society and it's even so determined effort of Mr. and Mrs. Diane to keep them from it goes only little and Diane seems to indicate that each other will be the death of Mrs. Diane.

Edie again proves the time was there—when there's a will there's a way—and then things happen. A short scene coming off the Palace bill.

TEACHERS REHIRE

One Position at Prospect Left Open

By Resignation

EDMONTON, May 25.—The school board met Monday night, the following ten here were hot for the coming year:

Superintendent H. Kunz of Clay Center principal of the high school; Mary Ann Peter, Annette Nicholson, Crystal Haynes and Ruth White Smith Hughes department; Mrs. Margaret McCall and L. D. Allright, teacher of grades and teacher of seventh grade; Miss Ruth Becker, teacher of Grade 1; Mrs. Mabel Martin, teacher of Grade 1; Misses Wren, fourth grade; Mabel McCall, fifth grade; Eddie Howl, the sixth grade teacher. She is not

THE STAR MARION, OHIO, WEDNESDAY, MAY 26, 1937

Miss Edna Brewer has resigned. The Farm Bureau met Monday night at the school auditorium. The session opened with the secretary's report. President is Franklin Bush, reporter of the county board meeting at Marion. Percy Clark, president of Marion, was present. The guest of honor was Mr. and Mrs. Clayton Kuehnl and Mr. and Mrs. Frank Morris of North Cobain in Mansfield.

Mr. and Mrs. J. F. Smith of Toledo were guests of Mr. H. F. Smith Saturday night and Sunday. Callers on Sunday afternoon were Mr. and Mrs. C. V. Schwartzkopf of Toledo and Mr. and Mrs. B. M. Ritter and Rev. Mr.

Daughters of Hobart were calling on Nevada friends.

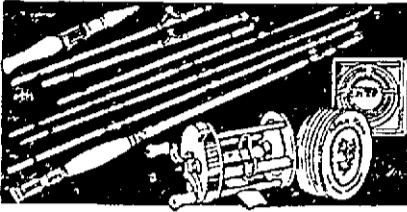

Mr. and Mrs. K. D. Sharp and daughter Shirley were in town.

Mr. and Mrs. A. G. Jackson, Mrs. Ethel Jackson and son Donald and Miss Arlene Wilson spent Sunday in Marion.

Daily Proverb—Vice is its own punishment and sometimes its own cure.

Three pairs of twins have been born to a couple in Sharon, Pennsylvania, during the last four years. There ought to be law.

France was grave danger in Premier Mussolini's speeches. There's little chance that they will result in harm if the French people exercise their brains and pay no attention to them.

Men may rule the world, remarks the Rev. Charles J. Flanagan, but in the end the world is what women make it. It's a hundred to one shot that the reverend gentleman is married, or has been.

The Republicans of the state of Washington by starting a wet-or-dry fight within their party ranks, seemingly are bent on doing their utmost to elect the Democratic congressman from that state next fall.

The finding of an extra ace and an extra jack in a Chicago poker game in which nine men were participating led to a fight which soon took on the earmarks of a riot. Card manufacturers can not be too careful in putting out their products.

The American matador over in Spain was widely applauded when he killed his first bull in the fights of last Sunday, and yet more vigorously booted when he failed to kill his second bull right off the mark which goes to show that people are a lot alike the world over. Our successes are applauded, our failures jeered.

The 3,000,000,000 franc surplus of French imports over exports for the first four months of the present year will not strike one as quite so impressive when consideration is given that the French franc is worth but 3.12 cents in our money.

The New York state Communists have nominated William F. Foster as their candidate for governor. Foster is in jail, but he will probably be out long before there is call for him to take the oath as the state's executive—an awfully long time before in fact.

Still, even should the police authorities of Trenton, New Jersey, put up the bars against the use of radios on Sunday, they threaten to do as a phase of the Sunday blue law fight in progress there. It wouldn't be such an awful hardship. Amos and Andy aren't on the Sunday programs.

Jewels valued at \$1,000,000 stolen from hotels in Miami Beach and Palm Beach, Florida, last winter, were recovered in New York City, this week and the five men and two women in whose possession they were found arrested. It's a strange thing considering the number who lead lives of crime, that nobody has yet been able to show that crime pays.

A Life Full of Adventure

William H. Savage joined the United States marines in 1881 and was on the gunboat, Mississippi, aboard which was a young lieutenant by the name of George Dewey who subsequently required time when that craft was sunk off Port Hudson. He was captured and confined in Libby prison but escaped after three months. He was a pony express rider and carried the mail between Tucson, Arizona, and the Mexican border for a time. He became a part owner of the one time famous Tombstone, Arizona. He participated in campaigns against the Indians in Arizona, Nevada and southern California. After a term in the army he settled in the San Pedro district of California, where in succession he became a judge, state senator, city attorney and councilman. There he raised a family of son and six daughters, the youngest daughter having been born fifteen years ago when he was seventy eight. He died at his San Pedro home Monday at the age of ninety-three being at the time of his death the oldest man in the country who had served in the United States marines.

This Californian may have been by nature a man of exceptional vitality, he may have been exceptionally fortunate in escaping ill results from the dangers his adventurous life invited, the least of which were not those he incurred as a result of his connection with the Laramie trail in the wild and wooly days of Tombstone, but even so it is evident that his record is a rather good endorsement of the value of a rugged life, of a life of hazard and adventure.

Occasionally a record somewhat similar to this herein outlined comes to public notice and naturally causes one to wonder if it isn't possible that the most of us would profit by a life harder than that we lead to wonder if the quiet, conventional life, the average man lives is really best for him. Isn't it possible, even probable that the most of us pamper ourselves too much in our way of living?

Russia and Foreign Capital.

More light on the treatment of foreign capital in soviet Russia is had from an article in a recent issue of the Moscow *Iskra* telling of the abandonment of work on the Lera gold fields in regions in Siberia and the expulsion of all American and British miners out of the domain of the Bolshevik government.

The article explains the abandonment of the fields by saying that the government was compelled to dismiss those engaged on the work because of lack of funds with which to pay them but further statements in the article do not tally with this explanation and cast doubt upon it if they do not absolutely refute it.

The concession was originally granted to a British company, which in some way was not explained lost it. Later it was regained by a British American company, financed chiefly in New York City, which worked it for several years very profitably. As the concession was considered one of the most promising in Russia the company invested largely in new dredges and other machinery to increase its operations and enlarge its financial return therefrom. Several months after the new machinery was on the ground and had proved all that was expected of it difficulties arose, the company claims as a result of a soviet ruling, stopping the exportation of gold from Russia and tying up the company's gold in the state bank of Moscow.

That there is little chance that the company will be able to regain this gold is indicated by the further statement in the article to the effect that the soviet government charges the company with sabotaging its agreement and proposes to sue it for failing to keep some 20,000 workers in the nearby Alin gold fields supplied with food, which failure, the soviet government claims is causing them to desert that field. It is not claimed that the British American company was obligated by any agreement to supply the Alin gold field workers with provisions but it is held out that because of existing conditions the company should have done so, that the demands of humanity should have prompted aid to them. Such a proceeding is the Russian government contemplates could not be maintained of course, in any land save Russia, but it's an easy guess that it will be there and an excuse be found for appropriating the gold of the company to its own use and that will spell ruin to the last important enterprise operated in Russia by foreign capital.

And yet, despite the fate of this British-American Lena gold fields enterprise, and the similar fate of many other enterprises developed by foreign capital in Russia, it is not at all improbable that American capital will continue to flow to Russia in response to the call held out by international bankers of big financial returns.

If Americans simply must burn up their money, why should they not play poker or something like that, and have the fun of burning it themselves rather than turn it over to others to burn it for them?

An Associated Press wire from Buffalo, New York, predicting the signing of the Canadian liquor export ban bill within a week by the governor general of the Dominion says that the lake rum-runners will near the end of their career. We wish we could think so, but for some reason we can not help but recall the interment ten years ago, of old John Burleycorn which apparently didn't die.

The Way Cleared for Action.

The action of the council in initiating the necessary legislation and clearing the way for the city's street improvement program for the year is gratifying. The program embraces seven improvements but the general interest is in that of Main street which is to be resurfaced from George street south to Columbia and widened from the first alley south of Church street to Columbia to make the section of the street to be improved uniform in width throughout. The general interest in the improvement of Main street is natural for the reason that it is one of our leading thoroughfares and the only direct connecting link between the approaches to the city from the north and the south.

Now let us hope that nothing will develop to hold up this particular improvement as the reconditioning of Center street was retarded last year but that will be exceeded that there may be no ground on which to have a controversy such as that developed then.

Citizens were kept on mental tent hooks last fall through the fear that the Center street improvement would not be completed before bad weather set in and the street would be torn up all winter. Let us hope that there will not be any strain such as that this year.

For the past four or five days crowds have blocked the side walks of New York in the vicinity of Park Avenue and Forty Fifth street mistaking an eighteen inch gold ball on the flagpole of the New York Central's thirty five story building for a rifle salvo. And the funny phase of the thing is that most of them can see the silver moon over ion the sky. What is the duniton of a tick town now?

F. Scott Fitzgerald general superintendent of the Anti-Silken League says the Ultimatum does not represent the actual feeling of the people and he may be right about it. The United States mail laws are so strict that expression of American feeling might have had serious consequences.

One hundred and four of the 100 Communists arrested for disobeying police orders in a demonstration in the Pere Lachaise cemetery in Paris proved to be foreigners. Why should France or any other country for that matter permit the influx of other countries to remain within her boundaries to encourage the breaking of race orders and the defense of minority genetics? Wasn't that what the revolution here in the United States as we do?

PRESIDENT HOOVER; "WHAT'S ON YOUR MIND?"

Editorial Opinion

QUOTING THE RHINE AND

No matter what the season there seems to be odds along the roads. But during the spring months particularly we hear of many fatal accidents to the feet in them. A section of the country seems to be free from them.

During the last few weeks in New York City a real army of ticks has made life miserable for thousands of persons. Infectious threats with mite species, symptoms which hang on for weeks at a time, have worn down the resistance of those afflicted.

If a person has an infection such as a cold, it means that a certain germ has attacked the nasal membrane and that the virus from that germ is in the air, it gets into the system. The nose membrane cells then go through the reaction of inflammation. This is as becomes sick because certain cells of his body are no longer healthy.

If a person has an infection such as a cold, it means that a certain germ has attacked the nasal membrane and that the virus from that germ is in the air, it gets into the system. The nose membrane cells then go through the reaction of inflammation. This is as becomes sick because certain cells of his body are no longer healthy.

When the ticks pester a still only slightly infected all the muscle cells may be affected. Then 200 act as a result.

It relates between fatigue and infections disease has not been well known by the general public. With fatigue there usually come constipation and stomach disorder. You know him this is. Shivers in the limbs and sneezes come to make life miserable.

No matter what season of the year is upon us you should not neglect a cold. The after effects of a cold may last well into the summer months. So a person finds him self susceptible to every draft and to every change in the weather.

The inflammation of the mucous lining of the nose and throat can be relieved with a ten per cent solution of arsene, which cleanses and disinfects. Using a spray of a good alkaline solution helps to clear the nasal passage.

A cold usually means that the system must be rid of excessive mucus. To reduce this condition may be taken internally. Thorough cleaning to help off other viruses and the body cells are then better able to combat the acute condition.

If you want to get rid of a cold you must exercise. Walking is the ideal physical activity needed at this time. One can often walk off a cold. Vigorous exercise of this kind is the best thing to do for the sluggish condition which always accompanies a cold. Get the skin to glowing and perspiring.

Exercise helps to eliminate the body poisons while it puts the abdominal muscles into better condition. The circulation of the blood is quickened.

You should eat the most simple food and stay away from places of amusement where the air is contaminated. Sleep with all the windows open. Be warmly enough dressed in changeable weather and if it is warm weather do not sit in drafts.

Rest is one of nature's greatest remedies. It is impossible to try to throw off the infections of a cold and to use your energy in hard work all at the same time. Children as well as adults, who live hard, should have long hours of sleep and rest in order to give the body cells recuperative power. The fatigued element loses resistance to disease and this should be avoided.

ANSWER TO MULHERN

M. M. H.—What would you advise for dark circles under the eyes?

A—Get plenty of sleep, correct your diet and avoid constipation.

M. M. H.—Q—What do you advise for pimples and blackheads?

A—Correct the diet by cutting down on sugar, starches, coffee and tea. Eat simple food. For further particulars send addressed stamped envelope and repeat your question.

J. O. Q.—What do you advise for constipation?

A—At simple foods. Avoid foods unduly rich in fats and starches. For further particulars send addressed stamped envelope and repeat your question.

S. M. Q.—Is it beneficial or harmful to lie in wet, dark-colored slacks?

A—No, the harmful nor much at unless used for certain eye diseases.

MRS. JOHN L. Q.—How can I gain weight?

A—Build up your general health and you will gain weight. Try taking a tablespoonful of cream in the morning.

F. C. B. Q.—What is and what causes cellulitis?

A—An embolus is a plug composed of a detached clot mass of bacteria or other foreign body, occluding a blood vessel—Copyright 1930, Newspaper Feature Service.

Third to Believe

Harry C. W. May 1, right in earnest that the 1930 election was the most important in the history of this country. It is right in earnest that the quiet, conventional life, the average man lives is really best for him. Isn't it possible, even probable that the most of us pamper ourselves too much in our way of living?

A Star's Interior.

BY MR. RICHARD HENDERSON.

One of the great triumphs of modern astronomy is the explanation of what goes on in the interior of a star. It has not yet been found feasible to penetrate very deep into the interior of the earth. But the theories regarding the constitution of the atom have thrown a flood of light upon the problem of what is occurring on the inside of these huge celestial machines called stars.

The newer theories have established some fundamental facts regarding radiation. It is believed that the atom is something like a miniature solar system with electrons revolving with extreme rapidity in orbital motion round a central nucleus. The number of these electrons has wide variation from one to one in the case of hydrogen to ninety two in the case of uranium.

It used to be believed that light and other radiation were emitted by the electron as it traversed its own orbit. But minute and exhaustive spectroscopic investigations demonstrate that radiation is given out only in the case where there is a change in energy. This occurs when an electron changes orbits or as we may say jumps from one particular orbit to another. When it gains an excess of energy by the transfer radiation is produced. This radiation may be identified in various ways—heat, x-ray radiation or even a light which is visible to the naked eye.

Precise discoveries regarding the happenings in the interior of a star have been made through the application of general principles, both mathematical and physical. From these it is estimated that the interior of a star is almost inconceivably hot. The temperature runs up into millions of degrees and the pressure into millions of atmospheres as Adams says.

In the first place it is evident that all the electrons except the innermost ones will be stripped from the atom and that the interior of the star will be filled with free electrons which is about in all directions and are distributed and recombinant with extraordinary rapidity. A second result of these terrific temperatures is that radiation in the interior of the star will be enormously intense and mainly in the form of very short waves such as x rays. These other waves seek to pour out toward the surface of the star like a great wind but on their way they encounter the muddled atoms and electrons of the closely packed gases which tend to obstruct their progress. The result is an outward pressure toward the surface of the star—the pressure of radiation.

This pressure of radiation mounts into high figures in the case of stars of huge mass. Indeed it may even approximate to the force of gravity which holds the stars together.

If a celestial body were much larger than the sun it would blow up—literally explode into atoms—as the result of radiative pressure. The phenomena which occur in the star's interior have thus been interestingly described by Eddington.

Dislodged atoms tear along at 100 miles a second through their normal array of electrons being torn from them in the scintillate. The lost electrons are speeding 100 times faster to find new resting places. Let us follow the progress of one of them. There is almost a collision of an electron approaching a atomic nucleus but putting on speed it sweeps round in a sharp curve. Sometimes there is a side slip at the curve but the electron goes on with increased or reduced energy. After a thousand narrow shaves all hairs are within a thousand millionth of a second the hectic career is ended by a worse side slip than usual. The electron is finally caught and it attached to an atom. But scarcely has it taken up its place when an x ray bursts into the atom sucking up the energy of the x ray the electron drifts off again on its next adventure.

Coverdale, U. S. International Fire Service Inc.

I suppose most elm peeler know of the origin of the term hoe-cakes, but I did not until today. Darkies used to bake in the cotton field for midday meals blades of hoe—hence hoe-cakes.

One taxicab driver at least is even to write at his guild in this column. His revenue \$1.25 for a trip to his favorite restaurant.

Three of the most frequently mentioned celebrities names in New York are the wife Bodanzky, Katherine Cornell, Elizabeth Warbury. Nine times out of ten they are written Arthur, Kathie Elizabeth.

Mr. Bodanzky is little known outside the music world but as conductor of the Metropolitan has become one of the nation's most beloved figures. He resigned two years ago and his successor introduced with a great deal of enthusiasm.

Mr. Bodanzky was brought back to the musical world by a successful tour of Europe. He has since returned to America and is now a well-known figure in the musical world.

One discovered later—handed him a quarter.

TOWNSHIP GRANGE BOOSTS MEMBERSHIP

Grand Prairie Farm Group Increases Roll from 36 to 180.

(Continued from Page One) orchestra of 21 pieces, which has taken part in a number of prominent grape meetings. The orchestra was organized by R. T. Thew.

Once established, the grange displayed an active interest in other similar groups which were then in their infancy, and assisted in organization of Progressive, Salt Rock, United and Kirkpatrick granges.

Mrs. Fred Gilbert was installed as juvenile matron with 15 members when the grange was first organized, but interest waned and the group ceased to meet. It was later reorganized by Mrs. Thew, and has since continued to be active.

The grange has conducted funeral services for two of its charter members. Carl Strickle died in 1925 and two years later J. N. Herroth was claimed.

Present officers of the grange are: Forrest Louderlager, master; C. D. Myers, overseer; Mrs. C. D. Myers, lecturer; F. A. Davison, steward; Howard McCurdy, assistant steward; Mrs. L. A. Williams, chaplain; Louise Hinman, treasurer; Paul Hill, secretary; Carl Hill, gate keeper; Mrs. R. Hitch, extra; Mrs. A. J. Louderlager, porta; Mrs. D. W. Hinman, Pomona; Louise Hitch, lady assistant steward.

Nothing amuses a baby that doesn't annoy grown folks.

Arthur Brisbane's Today

(Continued from Page One)

For interesting bits tell us that in Chicago yesterday Jacques (4,100 famous violinist, carrying a \$10,000 Stradivarius, once owned by Planchat dressed himself in street clothes and played on the sidewalks of Michigan Avenue with a little cigar box to collect coins. He got a few one-five and ten cent pieces very few for a concert for which he would ordinarily be paid \$1,000.

Some one concludes that the experiment proves great popularity to be all hollow!

It proves only that reputations are real, but hearts are ignorant. In London, a man in a crowd street offered genuine gold sovereigns, worth \$5 for sixpence each. He didn't sell any. The sovereigns were good, the crowd was skeptical.

DWIGHT W. MORROW is expected to tell the voters of New Jersey tomorrow that he is not a candidate for President in 1932 nor does he want antagonism between him and President Hoover.

The presidential suggestion came from Mr. McRae of the Anti-Salvation League who probably would not run at friction between the President and dry and Dwight Morrow, of course wet.

Mr. Morrow, in business a long time, has learned to do one thing at a time. He isn't thinking about it while working to get another.

Four American mothers whose sons had been killed in the war 1914-1918 scratch on the tomb of the unknown French soldier. A French general who had seen royalty and statesmen visit that tomb said he had never seen such deep feeling as those mothers showed. Naturally, only a mother who son has been killed knows what we mean.

Scientists of Lowell Observatory are said to have selected the name Pluto for the new planet. They will make another selection if it is not an American planet.

An American Professor Lowell predicted the discovery of the planet another American discovered it. It is, therefore, an American planet and should have been named after Newton, or for Washington, Jefferson, Lincoln, Hoover or Theodore Roosevelt.

For shuffling to airplanes at night a New York man has invented rows of electric lights set in the ground to make like wheel spokes from a central point and controlled by switches.

DON'T BE A SLAVE TO LAXATIVES

Mrs. E. Gabbard, 301 W. 5th St., Newport, Ky., says, "My husband and I were actually slaves to laxatives, continually dosing ourselves with something to relieve constipation. Just couldn't stop. It got to be a habit. We even gave our children laxatives in candy form. Little did we realize that we were only aggravating and not reaching the cause of the constipation. Headaches, biliousness, indigestion and constipation still continued."

Our druggist recommended Carter's Little Liver Pills. He sold these little vegetable pills would tone up the liver, stir up the bile, which, acting as an antiseptic, keeps the food from rotting, and poisoning the blood. They are not habit forming and thoroughly cleanse the upper and lower bowel. Laxatives fail to do this." Carter's Little Liver Pills are sold at all Druggists in 25c red paper packages.

IN LIQUOR PLOT

LATE NEWS FLASHES

AMERICANS WIN
By the Associated Press
ATLANTA, Georgia—American's first and second ranking woman tennis players, Mrs. Helen Wills Moody and Helen Jacobs, won their matches in straight sets in the French championships today but Mrs. Moody was forced to show her best tennis against her young English adversary, Phyllis Bedford.

HEARINGS NEAR CLOSE

By the Associated Press
WASHINGTON — The last of the witnesses summoned by opponents of the naval treaty were heard today before the Senate foreign relations committee and hearings will be closed tomorrow. A favorable report is expected soon thereafter. After two more naval officers had assailed the treaty, Senator Johnson of California, who called them, said he was through.

TAX CHANGES URGED

By the Associated Press
COLUMBUS, Ohio—A more general distribution of inheritance taxes and a tax upon incomes to catch intangible property were recommended to the Ohio Farm Bureau's statewide tax commission today as two means of equalizing the sources of Ohio's governmental revenues.

PROTEST AGAINST TARIFF

By International News Service
WASHINGTON — More than 300 protests and observations on the tariff bill have been received by the state department from over 30 foreign countries and forwarded to the senate finance committee. A large majority are from foreign trade organizations and individual producers. Some however, express the views of the government.

PRESBYTERIAN MEET

CINCINNATI, Ohio—Last minute campaign plus for selection of a moderator, which will occur tomorrow soon after the general assembly of the Presbyterian church in the U. S. A. convened here today occupied attention of hundreds of delegates and commissioners. Most of the testing candidates spent today in conference here with friends and supporters. The consensus of early arriving delegates was that the moderator's race was an open affair with no outstanding candidate dominating the field.

GEORGE UNDERWOOD PASSES AWAY HERE

Death of South Canaan Man Occurs at Home of Brother.

George Underwood, 71, of South Canaan, died at the home of his brother, David Underwood, at 301 South Grand Avenue today at 1:15. Death was caused by cancer of the stomach.

Mr. Underwood had been brought to the home of his brother about six weeks ago from a farm near South Canaan where he was employed. He had been ill for 10 weeks.

He is survived by two brothers, Jessie and David E. Underwood of Marion.

Funeral services will be held Saturday at the home of his brother, David, and at the South Canaan church. The services at the home will be held at 1 p.m. and at the church at 2 p.m.

TURNER SETS NEW RECORD IN FLIGHT

Los Angeles Aviator Achieves Fastest East-to-West Trip Across U. S.

GLENDALE, Calif., May 28—Roscoe Turner, Los Angeles aviator, today broke the record of the fastest east-to-west transcontinental flight on record.

Crowding his motor with a wide open throttle, Turner yesterday crossed the United States in 15 hours, 12 minutes, 51 seconds, making one stop for fuel at Wichita, Kas. The record lowered by 27 minutes, 18 seconds, the non-stop mark of 10 hours, 10 minutes, 22 seconds, set by Frank Hawks of Los Angeles, on June 27, 1929.

Daybreak in New York saw Turner away speeding over the same course he followed two weeks ago, when he failed by an hour and 13 minutes to break the west-to-east record set on Easter Sunday by Colonel and Mrs. Charles A. Lindbergh.

He had 150 gallons of gasoline aboard at New York. Late skies favored him but a 25-mile-an-hour headwind cut down his plotted time to the Kansas stop.

Striking out on the last lap to the Pacific coast, Turner sped against a slight head wind. Over Colorado a rainstorm gave him his first bad weather and as he reached New Mexico this turned to snow. The mountainous boundary of northern Arizona again brought clear skies and the pilot pressed to the coast.

announced his candidacy for senator for any one of the seats. Although documents are not yet presented, attorney Robert E. Muller, of the law firm of Muller and Thompson, is seeking nomination as state representative. Dr. J. W. Hall is after the nomination for coroner.

Miller in Race

W. N. Hander local attorney is a candidate for the Republican nomination for state senator from the combined third and thirty-first districts from which two are to be elected next fall. Robert L. Tiffin newspaper man and present state senator will be running for re-nomination and John P. Hower, Logan county lawyer, is seeking the Democratic nomination.

In the national field Grant F. Monson Jr. is expected to run unopposed for the Republican congressional nomination although he has as yet not filed his petition. Carl Smith of Kenton is seeking the Democratic nomination for congress and W. W. Durbin also of Kenton is a candidate for the Democratic nomination for U. S. senator, as well as Charles V. Truxas of Bucyrus, former head of Governor Donaldson's state department of agriculture under Governor Donaldson.

After the primaries the various winning candidates of the two parties will begin their active fight for election on Nov. 4.

MILLER REPRESENTATIVE

Marvin V. Miller was until recently representative to the annual state convention of Red Men to be held June 9, 10 and 11 at Sidney last night. Mr. Miller also has been named on the organizing committee for the convention. George Lower was named alternate.

CANNED POTATOES TO BE MARKETED

Sole "Holdout" of Vegetable Kingdom To Appear in Metal Containers.

PORLTAND, Ore.—The common and homely Irish potato which for years has been confined to dark earth and burlap sacks is about to enter the ranks of tin can society, according to David L. Randall, prominent Portland lawyer, a tree it visitor in Portland.

The potato is practically the last "holdout" of the vegetable kingdom Randall pointed out. All others have donned a tin jacket and taken their place on the grocer's shelf.

"There is a large field for this product," Randall declared. "Apartment house dwellers and others who live in congested areas will probably be the greatest consumers."

"Since we started experimenting over a year ago we have received numerous queries from wholesale houses and eastern buyers asking when we will be able to market the product."

"The first experimental lot held up in good shape for nearly a year," Randall said. "It will begin to work on the containers and their contents turned black. We believe this defect can be overcome by using frequented care."

"The potatoes are peeled in a large revolving scraper which takes off the skin leaving the eyes to be removed by hand," Randall explained. "Cubers are employed to cut the potatoes in long, narrow sticks so that containers can be packed tight before going to the cooker. Process cooking leaves the product surprisingly firm."

Convenience, saving of time and the conversion of modern cooks to "can opening" methods will equalize soon differences between the spud in the raw and the spud in the tin according to Randall.

The world production of silver has increased steadily since 1921, Mexico leading among nations followed by the United States and Canada.

Picnics Close Seasons for Two Marion Clubs

PICNIC meeting last night marked the close of the season for two clubs—the Women's Century club and the Birch Club. National members of the Women's Century club at the former, Mrs. Carl Loeffler of South Greenwood street; arrangements for the summer were in charge of Miss George G. Lippincott, Mrs. Paul Huber, Mrs. Fred O. Carl and Miss Anna Turner, members of the committee. There was a short business session program for next year to be voted on.

MRS. JAMES E. CRAWFORD, in charge president of the Birch Club, announced the social and program committee for the annual spring social last night at the home of Mrs. John H. Clark in the Elmwood.

Miss Caroline Dewar, Mrs. George Lippincott and Miss Grace Witzig were named on the program committee and Mrs. John Huber, Miss Mary Kull, Miss Delphine Hawley and Miss Velma Webb were named on the social committee.

The resignation of Mrs. John Huber as recording secretary treasurer was accepted and Miss Zelma Terry was elected to fill the vacant post. Mrs. Alice Gifford presented an Interact gift.

Here's a BEAUTY SECRET for You . . .

Now—radiant, lasting complexion beauty may be yours. The secret is an individualized powder—Plough's Face Powder!

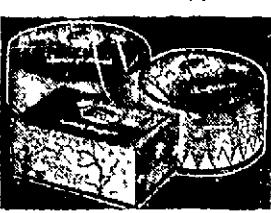

Specially blended in three textures, this modern face powder meets the needs of the three types of skin—dry, oily and normal.

Its five modern tints harmonize with Nature's flesh-tones and its smoothness and clinging quality assure positive adherence and lasting beauty.

Try Plough's Face Powder today. Choose light texture for dry skin, heavy texture for oily skin, medium texture for normal skin. Unsurpassed in quality and value and sensibly priced at 30c, 50c and 75c.

GOVERNOR NOMINEE DISBARRED BY COURT

Oregon Senator Loses Right
To Practice Law After Vic-
tory at Primary.

By The Associated Press
SALEM, Ore., May 28.—State Senator George W. Joseph, successful "indication" candidate for the Republican nomination for governor in the recent Oregon primaries, and Thomas Mannix, Portland attorney, were under permanent disbarment today by order of the state supreme court.

The decision upheld the recommenda-

tion of a board of Oregon lawyers appointed by the supreme court, that Joseph be disbared for life for an alleged attack on Justice John Hand.

Disregarding the board's recommendation of three years' disbarment for Mannix, the supreme court declared the attorney should never be permitted to practice law in Oregon again.

The case grew out of the adminis-tration of the E. Henry Weimer testi-
ment, which went to the supreme court. Joseph attacked Justice Hand, asserting that political and financial interests influenced decisions in cases and that "Mannix was too friendly with Hand."

Mannix then brought disbarment proceedings against Senator Joseph, who retaliated by bringing the same

charge against his accuser.

While the decision of the supreme court was pending, Joseph entered the primary campaign as a "re-indication" candidate. He won the nomination over a field of five other Republicans, obtaining a 5,000 plurality over Gov. A. W. Norblad.

Why the State of California Chose HUDSON'S Great 8

Its 100% Perfect Score

Hudson's Great 8, with 100% score over-
whelmed all competitors in tests con-
ducted by the department of Highway
Control of the State of California.

Nearly all makes made bids. Of these eight, ranging in price from \$1050 to \$1500 were submitted to tests in Speed, Reliability, Flexibility, Operating Ease, Steering Action and Freedom from Vibration, Shimmerying and Overheating. Hudson, one of the lowest in price, alone finished with a perfect score.

**Make These Proofs Yourself.
We Will Send a Car to Your Door**

Only by riding in or driving Hudson's Great 8 will you appreciate its delightful operation. You are invited to take a trial car and test it for smoothness, speed, acceleration, power, easy handling, comfort, and economy. A telephone call will bring Hudson's Great 8 to your door.

EATON STRENGTHENS INDUSTRY HOLDINGS

Cleveland Financier Forms
New Steel and Mining Con-
nections.

By The Associated Press
CLEVELAND, O., May 28.—Strengthening of the middlewestern steel and mining combinations by Cyrus S. Eaton, Cleveland financier, was seen today in the affiliation of the Cleveland-Ciffs Iron Co. and Oglebay, Norton & Co., Cleveland ore concern.

Eaton and William G. Mather jointly own a majority of the Cleve-
land-Ciffs stock through the Ciffs Corporation, a holding company.

The affiliation with Oglebay, Norton & Co. will add 10 ore boats to the fleet of 24 operated by the Cleve-
land-Ciffs-Iron and will give the Eaton-Mather interests the third largest fleet on the Great Lakes. This was interpreted as strengthening the position of Eaton's Republic Steel corporation through control of special ores necessary for steel production in addition to the engineering and supervisory services of Cleve-
land-Ciffs & Co.

Ruth Reed returned home Sunday after spending a week with Mrs. Vernon Her and family of Marion.

Mr. and Mrs. Eddie King and family of Dayton were weekend visitors at the home of Mrs. C. Gardner and Mrs. Charles Teetz and family.

Mr. and Mrs. W. A. Dickson of east of Martel, entertained Sunday Mr. Harvey Dickson of Mansfield, Mc-

possible to eat corn without first boiling it with the husks. For those who like the flavor of the green corn, but do not like the spectacle of eating it off the cob, it can be cut off raw and cooked as one does carrots or beans. There's no cooking. It loses some flavor by this method.

Corn cut raw off the cob and added to cooked fresh limas is a most delicious combination. The limas must be cooked until tender in as little water as possible to keep them from bursting. Then the corn kernels are added and cooked another minute or two, just long enough to make them tender. Then add a bit of butter, salt pepper and a spoonful of cream.

If any corn on cob is left over, it can be run through a food chopper and cooked in a number of ways.

It makes an excellent cream soup added to twice its own quantity of milk and thickened slightly with a spoonful of flour and butter.

ARREST HUMAN "APE"

By The Associated Press
TOLEDO, O., May 25.—A man who described himself as the "ape from Pittsburgh" was under arrest here today charged with attacking a girl Sunday in a downtown parking lot. His victim saw him on a street yesterday, fainted, but was revived and trailed the man.

Cheap Bread Cheats In Many Ways

There IS a difference in bread

WHEN you buy bread you are buying nourishment, food-value, health.

When you buy cheap bread lacking these essentials you are getting nothing but cheap bread.

Can any thinking mother afford cheap bread when a week's supply of Holsum costs

but a few cents more than the cheapest bread... when these few pennies are returned in health and extra nourishment?

For low-cost nourishment, for true economy hundreds are changing to Holsum. Thousands have changed to Holsum. Have you?

CARDS, SENATORS HOLD LEAGUE LEAD

BROOKLYN LOSES TO NEW YORK CLUB 3-1

Philadelphia Athletics Win Third Game in Row at Expense of Red Sox.

By HUGHES FULLERTON, Jr., Associated Press Sports Writer
Two major league baseball teams—the St. Louis Cardinals and Washington Senators—are doing their best to break away from the pack of contenders in the close major league race, but so far neither has been able to do it.

Washington's nine-game winning streak and either 3 years or holds in first place.

Washington is quite safe for the present, holding a margin of two games over the Philadelphia Athletics. However, the Senators cannot take many chances and still remain ahead. To get to its present 3-1 winning streak, Washington had to win seven games in a row and continue an almost unbroken streak through 20 contests. The Senators have won eleven out of their last 12 games and 10 out of 20.

The Senators will play their place yesterday by the New York Yankees 7 to 2. Sam Jones was the whole show. He led the Yanks to four hits three of them going to Pale Ruth. Ruth is in his fifth complete game of the year and won his sixth successive victory. His teammates backed him up to the extent of 11 hits.

Win Streak Broken

The Cardinals' string of victories was broken for the second time in 14 games yesterday and St. Louis lost a fine chance to set a new lead over the Brooklyn Robins. But the St. Louis hitters were not much more effective against Harry Penn than they were against Bill Walker, and the Robins were against Bill Walker and the two leaders of the National League went down in defeat, remaining a half game apart. St. Louis lost to Pittsburgh 5 to 4 and Brooklyn to the New York Giants 1 to 0.

The Cards started winning May 7 and ran nine games before their first setback. Then they added eight more victories before running into French visitors. The Dutch hurler worked after only two days rest, yet he did his best but was effective in the right spot. He also started Pittsburgh off to a good start by hitting a triple with the bases full in the second inning, then scoring the fourth run.

Brooklyn did not get started against Walker's pitching until the eighth inning and by that time the Giants had gained a three run lead which
